Descriptions

SST20 inclinometer is designed on the basis of Vigor's advanced tilt measurement technology, to meet the low cost requirement, high reliability and volume application, performs high performance-cost ratio.

SST20 adopts most universal & mass-produced components, die-cast aluminum alloy casing, universal high reliability M12-5pin industrial connector, full epoxy seal with IP67 protection, auto-test/calibration equipments which not only ensure delivery speed, also keep the consistency of goods.

Thanks for Vigor engineers, they adopt advanced technologies as:

- CAE/EDA simulation;
- Modal test for both housing and PCB to eliminate resonance due to vibration;
- Comprehensive performance & function test for component & firmware;
- Refer MIL/ EN/ ISO/IEC standards to enhance SST20 durability & reliability.

SST20 supports remote diagnosis without disassembling. MTBF more than 10 years per time and has good EMC ability.

SST20 can output RS232/RS485/CAN/CANopen and Voltage/Current signals. Better power management to meet with automotive /truck/vehicle application without regulated power.

OEM service is available with MIL qualified.
